CONTENT STRATEGY

# Content Strategy for a Dhaka Specialty Dessert Cafe

Local F&B; content system designed around discovery, craving, community and store action

| | | | |
|---|---|---|---|
| Portfolio Project | Content Strategy | Market Type | National / Local F&B; |
| Business Scenario | Bistro B42 (hypothetical specialty dessert cafe) | Geography | Dhaka, Bangladesh |
| Business Goal | Increase qualified local discovery, table visits and delivery orders | Primary Objective | Build a content strategy where every recurring pillar has a clear business role and measurement path |
| Prepared By | SHAKIR HOSSAIN TALHA | Role | Social Media Strategist & Marketing Researcher |
| Research Date | 25 April 2024 | Research Mode | Desk research + strategic inference |

**The best restaurant content does not only make food look good; it makes the next action feel obvious.**

Prepared for portfolio demonstration: research depth, strategic reasoning, customer understanding, market analysis, content/creative systems, and execution planning.

SHAKIR HOSSAIN TALHA
Social Media Strategist & Marketing Researcher
Research conducted: 25 April 2024

**Scope note: This is a self-initiated portfolio simulation built from publicly available desk research. The business, goals and performance data in the scenario are hypothetical unless explicitly stated as an external benchmark. No client relationship or guaranteed result is claimed.**

# 01. Executive Summary

The content strategy uses TikTok's F&B; research as a behavioural benchmark and Bangladesh's large social audience as local context. TikTok's food-and-beverage playbook reports discovery and purchase behaviour tied to food content, while its local-feed rollout makes location-based discovery more explicit. For Bistro B42, the strategic challenge is to translate visual appetite into local intent: “Should I visit, order or save this place for later?”

## Research Questions

- Which content pillars map to the restaurant's business objective?
- Which topics create discovery versus consideration versus conversion?
- How can local relevance be built into content?
- What should be measured besides views and likes?

## Key strategic conclusion

**Build a five-pillar system: Signature Food, Behind the Kitchen, Local Discovery, Social Proof, and Occasion / Offer. Each pillar should have a defined role and CTA, and content should be optimized for local audience quality, not just generic viral reach.**

## Why this project belongs in a portfolio

- Content strategy architecture
- Funnel-aligned content planning
- Local business relevance
- Topic-to-format-to-CTA mapping

# 02. Market & Customer Research

TikTok's Food & Beverage playbook reports that 63% of TikTok users surveyed discovered new F&B; products on TikTok in the last month, while 54% actively searched or researched F&B; brands/products they were interested in buying. TikTok also launched a Local Feed in 2026 for location-based discovery. These findings are not Bangladesh-specific, so the portfolio treats them as directional evidence, then requires local testing.

## Market evidence

| Evidence | Public benchmark | Strategic implication |
|---|---|---|
| Food discovery | TikTok F&B; playbook: 63% discovered new F&B; products in past month | Discovery content can have direct commercial relevance. |
| Research intent | TikTok F&B; playbook: 54% researched F&B; brands/products they wanted to buy | Profile, maps, menu and proof content matter after discovery. |
| Local discovery | TikTok Local Feed launched in 2026 | Geo-relevant content and location cues become more valuable for local businesses. |
| Bangladesh reach | DataReportal reported 60M social-media user identities in early 2025 | Local F&B; can justify social as a meaningful top-of-funnel channel. |

## Customer research synthesis

Restaurant audiences are situational. The same person may be a “quick lunch buyer” one day and an “occasion dessert seeker” another day.

| Occasion segment | Need | Content trigger |
|---|---|---|
| Solo / quick order | Convenience + taste confidence | Menu clarity, delivery proof |
| Friends / couples | Experience + shareability | Ambience, signature items, creator-style reviews |
| Family | Reliability + variety | Portion guides, seating, menu breadth |
| Food explorer | Novelty | New items, behind-the-scenes, sensory content |

# 03. Strategic Diagnosis

A restaurant page can be active and attractive yet strategically weak if all posts look like menu cards. The content system should cover multiple decision stages: discover -> evaluate -> trust -> visit/order -> return.

## Observed / inferred signals

- Food is highly visual and suited to short-form demonstration.
- Local relevance matters because physical visits are geographically constrained.
- Proof from creators/customers can reduce uncertainty.
- Offers should not become the only reason to interact with the brand.

## Root-cause hypotheses

| Content gap | Why it matters | Example |
|---|---|---|
| Low local context | People may like the food but not know where / why visit | Neighbourhood guides, location cues |
| Weak proof | Pretty images may not answer “Is it worth going?” | Customer reactions, creator visits, kitchen transparency |
| Offer overuse | Discounts can train price sensitivity | Occasion-led value and signature-product storytelling |

## Priority decision

**Design the content calendar around customer occasions + business objectives, not a random list of food photos.**

# 04. Strategy & Strategic Architecture

The content strategy framework is BUSINESS GOAL -> AUDIENCE -> PROBLEM / DESIRE -> OBJECTIVE -> CONTENT ROLE -> PILLAR -> TOPIC -> FORMAT -> CTA -> MEASUREMENT.

## Strategic architecture

| Pillar | Role | Topic examples |
|---|---|---|
| Signature Food | Desire / discovery | First-bite reactions, texture shots, signature item stories |
| Behind the Kitchen | Trust / personality | Preparation, staff, sourcing, process |
| Local Discovery | Reach / local intent | “What to order near Banani on a rainy evening” |
| Social Proof | Trust / consideration | Customer reactions, creator visits, reviews |
| Occasion / Offer | Conversion | Weekend plan, group bundle, limited genuine launch |

## Positioning / strategic choice

> **A neighbourhood dessert destination known for signature textures, warm hospitality and discoverable food moments - not simply “another cafe with pretty plates.”**

## What we would deliberately avoid

- Do not publish only promotional graphics.

- Do not chase irrelevant national virality when the business depends on local demand.
- Do not hide the actual offer behind clickbait.
- Do not measure success only by views.

# 05. Execution Plan & Portfolio Artifact

The portfolio artifact is a 30-day content strategy with 5 pillars, 30 topic hypotheses, format logic and CTA mapping.

## 90-day / sprint priorities

| Week | Focus | Example content |
|---|---|---|
| 1 | Discovery | Signature item short-form series |
| 2 | Trust | Kitchen / staff / customer proof |
| 3 | Local relevance | Neighbourhood and occasion content |
| 4 | Conversion + community | Offers, Q&A;, reviews, repost-worthy moments |

## Example deliverables

- Content pillar framework
- 30-day content matrix
- Topic bank
- Format and CTA map
- Local discovery content ideas
- KPI dashboard

## Measurement framework

| Objective | Primary KPI | Supporting signals |
|---|---|---|
| Local discovery | Qualified local profile / map intent | Reach by area, profile taps |
| Consideration | Menu / location interactions | Saves, shares, website taps |
| Conversion | Orders / reservations / walk-ins attributed to campaigns | Coupon or code usage |
| Retention | Repeat visits / repeat orders | UGC, review volume, returning traffic |

# 06. Advanced Insight, Testing & Validation

The key insight is that content mix should be designed around business constraints. A local restaurant does not need the same content strategy as a national packaged-food brand because the conversion geography is different.

## Experiments / validation plan

| Test | Variable | Decision rule |
|---|---|---|
| Creative format | Dish close-up vs customer experience | Compare local high-intent behaviour. |
| CTA | “Order now” vs “Save for weekend” | Match CTA to content role and occasion. |

| Test | Variable | Decision rule |
|---|---|---|
| Local angle | Generic food trend vs neighbourhood context | Prefer stronger local intent and action. |

## Risks and research limitations

- TikTok F&B; research is not Bangladesh-specific.
- Actual location-level demand must be validated with platform analytics and sales data.
- Attribution for walk-ins can be imperfect without disciplined tracking.

## What a real client engagement would validate next

- Interview 8-10 recent customers about discovery source.
- Track map/profile/menu actions.
- Tag content by occasion and content role.
- Build a simple first-party source-of-order question at checkout.

# 07. Sources, Methods & Ownership

## Source methodology

Sources were selected to support market context, platform behaviour, customer trust, competitor positioning, or operational practice. Recommendations are marked as strategic inference where they go beyond the source facts. External benchmarks are not presented as the hypothetical business's own results.

## Research sources

| # | Source | Publisher / Date | Use in research |
