CAMPAIGN / ANALYTICS / RESULTS

BANGLADESH | EDTECH

FROM SCROLL TO STUDY

Campaign, Analytics & Results Playbook

A performance-led enrolment campaign concept for turning short-form learning content into diagnostic completions, paid course enrolments and early learner activation.

BUSINESS / RESEARCH SCOPE

Shikho

PREPARED BY

SHAKIR HOSSAIN TALHA

ROLE

Digital Marketer | Campaign Analytics & Social Media Strategy

CASE DATE **12 January 2026**

Portfolio case reference date requested by the author. Public-source review and strategy exercise; not a claim that the campaign ran on this date.

01 / STRATEGY

The conversion hypothesis

THE BET

Students need to feel a quick learning win before committing. A tiny demonstration of progress can reduce uncertainty better than a generic “study better” promise.

PRIMARY BUSINESS OUTCOME

Generate qualified course interest and paid enrolments while tracking post-enrolment activation - not just cheap video views or leads.

THREE AUDIENCES / THREE JOBS TO BE DONE

01 / STUDENT

SSC & HSC learners

Wants a clearer explanation of a difficult topic; needs low-friction proof before asking family to pay.

02 / ADMISSION

Admission-test learners

Feels time pressure; responds to a diagnostic that identifies what to revise next.

03 / PARENT

Parent / guardian

Needs confidence in teaching quality, course fit, pricing transparency and support.

CAMPAIGN CONCEPT

THE 5-QUESTION PROGRESS CHECK

02 / CREATIVE LAB

Build a learning moment into every ad

THE 5-QUESTION PROGRESS CHECK

A proposed micro-diagnostic: answer five curriculum-aligned questions, receive a topic-level feedback card, then see the relevant course pathway. This is a campaign concept, not a claim that this exact feature currently exists.

HOOK A

“Can you solve these 3 questions?”

Native vertical lesson clip; show one question, pause, reveal the method, then invite the diagnostic.

CTA

Take the 5-question check

HOOK B

“One confusing topic. One clear explanation.”

Teacher-led whiteboard/animation; before/after understanding without promising grades.

CTA

Watch the solution

HOOK C

“Your next 7 days of revision, mapped.”

A sample study-plan carousel; parent-facing proof and a clear course-fit CTA.

CTA

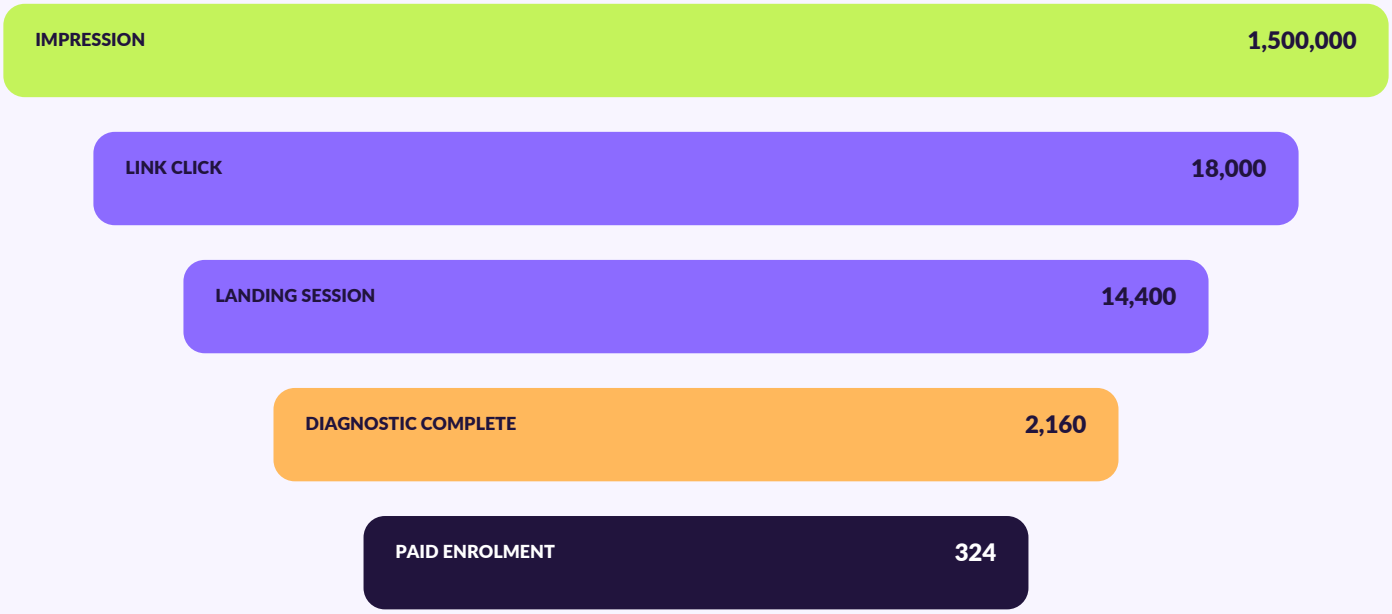

See the course fit

30-DAY CHANNEL MIX

Meta Reels / Stories	35%	Discovery and retargeting; Bangla-first creative, age-appropriate targeting, parent-safe copy.
YouTube Shorts	20%	Teacher explanations and contextual reach; optimise to engaged view and qualified site visit.
Education creators	15%	Credible walkthroughs, disclosure and course-fit explanation - avoid guaranteed results.
Conversion retargeting	20%	Diagnostic completers, course-page visitors and checkout starters; suppress enrolled users.
Test reserve	10%	Hook, learning format, landing-page CTA and message tests.

03 / ANALYTICS ARCHITECTURE

Track progress, not noise

EVENT TAXONOMY

- ad_impression / link_click
- diagnostic_start / diagnostic_complete
- purchase + course_id + value
- landing_view + campaign_id
- course_view / checkout_start
- lesson_1_started / lesson_1_completed

CORE KPI READOUT

CTR	Landing rate	Diagnostic completion	Diagnostic → paid	Cost per enrolment
1.20%	80%	15% of sessions	15%	BDT 926

04 / RESULTS DASHBOARD

SIMULATED SCENARIO

Illustrative campaign readout

MEDIA SPEND

BDT 300k

PRIMARY RESULT

324 enrolments

COST / RESULT

BDT 926

FUNNEL CHECK

Impression	1,500,000
Link click	18,000
Landing session	14,400
Diagnostic complete	2,160
Paid enrolment	324

EFFICIENCY SIGNALS

CTR	1.20%
Landing rate	80%
Diagnostic completion	15% of sessions
Diagnostic → paid	15%
Cost per enrolment	BDT 926

WHAT THE MODEL SAYS

SYNTHETIC DEMO DATA. Assumes BDT 3,500 net first purchase value per enrolment; revenue excludes refunds, variable costs, discounts and margin. Not Shikho results.

DASHBOARD READOUT / NORMALISED

CTR 1.20%

Purchase / session 2.25%

05 / DECISION SYSTEM

What to stop, fix, scale and learn

STOP

Any ad with high CTR but poor diagnostic completion after enough data.

FIX

Landing page loads, diagnostic value, course details, pricing clarity and parent FAQ.

SCALE

Only cohorts with acceptable enrolment CAC and a healthy lesson-1 activation rate.

LEARN

Compare first-month retention by acquisition creative, not only by campaign.

90-DAY EXECUTION

DAYS 1-30

Instrument events; build 6 vertical assets; validate diagnostic funnel; review search terms and comments.

DAYS 31-60

Run controlled hook tests; segment student vs parent messages; reconcile paid enrolments to backend.

DAYS 61-90

Shift budget to high-activation cohorts; launch course-fit retargeting; report CAC plus D7/D30 activation.

RISK REGISTER

- Education claims: never promise a grade, rank or admission outcome.
- Minors: age-appropriate creative, privacy controls and responsible lead handling.
- Attribution: platform-reported enrolments may not equal backend-paid enrolments.

06 / APPENDIX

Evidence, assumptions & author sign-off
