BANGLADESH | CONSUMER ELECTRONICS

PROOF BEFORE PURCHASE

Campaign Performance Control Sheet | Home Appliances

A lead-to-retail measurement design for a Walton refrigerator or air-conditioner campaign, built around product proof, dealer discovery and matched offline sales.

ROLE

Digital Marketer | Campaign Analytics

CASE DATE

28 January 2026

Independent portfolio case. Date is a reference label, not evidence of campaign execution.

01 / CONTROL OBJECTIVE

Define the pass condition

BUSINESS PROBLEM

Major appliances are considered purchases. A feature-led click is only a proxy; buyers still need proof on fit, service, warranty conditions, availability and total value.

DECISION RULE

Generate qualified dealer enquiries and traceable purchase outcomes - while keeping SKU specifications and warranty claims accurate.

BUYER / USE CASE MATRIX

SEGMENT	DECISION JOB	PROOF REQUIRED
A / REPLACEMENT	**Household upgrader**	Comparing reliability, capacity, service access and fit for the home.
B / NEW HOME	**First-home buyer**	Needs a simple shortlist, transparent specs and a way to find a nearby dealer.
C / SME	**Small shop or office**	Cares about capacity, operating use, service terms and downtime.

CAMPAIGN **THE HOME-FIT PROOF SERIES**

02 / DEPLOYMENT DESIGN

Every creative must answer a buyer objection

01 / PROOF 01

Show the detail

15-second video with model number, capacity, dimensions and a direct product-page CTA.

02 / PROOF 02

Service, explained

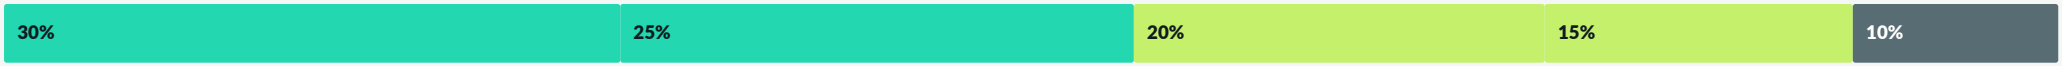

Carousel breaking down the published warranty terms - including exclusions and model variation.

03 / PROOF 03

Dealer next step

Localised creative with stock confirmation / dealer callback CTA; do not imply live stock unless integrated.

MEDIA DEPLOYMENT / PLANNING ALLOCATION

- **Meta video / Reels / 30%**
  Reach + product consideration; vertical demonstrations with model visible.
- **Meta lead / message / 25%**
  Dealer callback or product-fit enquiry with a short qualification form.
- **Search / product intent / 20%**
  Capture model, category and service queries where search inventory is available.
- **Retargeting / 15%**
  Product viewers, dealer locator visitors and qualified but unconverted leads.
- **Measurement reserve / 10%**
  CRM matching, lead quality audit and creative refresh.

SPEND ASSUMPTION

BDT 600,000 / 30-day planning scenario | Planning model only. Use SKU-level pricing, margins, lead values and authorised dealer data before live launch.

03 / MEASUREMENT CONTROL

A lead is not a sale

01	02	03	04	05	06
Impressions	Clicks	Product/dealer visits	Dealer inquiries	Qualified leads	Matched purchases
2,000,000	18,000	13,500	675	270	81

EVENT DESIGN / CRM JOIN KEYS

> ad_click + creative_id + model_id

> product_view + sku + category

> dealer_locator_view / dealer_click

> lead_submit + phone consent + city

> CRM qualified / appointment / quote

> sale_matched + sku + value + margin

REPORTING LADDER

CTR	0.90%
Visit rate	75% of clicks
Lead rate	5% of visits
Lead qualification	40%
Cost / qualified lead	BDT 2,222
Cost / matched sale	BDT 7,407

DATA RULES

UTM + creative ID on every ad. SKU, lead ID, city and CRM status must survive the handoff. Deduplicate leads, reconcile weekly, and only report verified sale matches. The proposed event names are a design, not evidence of current Walton instrumentation.

04 / RESULTS DASHBOARD

SIMULATED DATA / NOT WALTON RESULTS

Illustrative campaign readout

SPEND	IMPRESSION	RESULT	COST / RESULT
BDT 600k	2.00M	81 matched sales	BDT 7407

FUNNEL TABLE

Impressions	2,000,000
Clicks	18,000
Product/dealer visits	13,500
Dealer inquiries	675
Qualified leads	270
Matched purchases	81

RATE READOUT

CTR 0.90%

Session → primary action 0.60%

SYNTHETIC DEMO DATA. No sales value or ROAS is claimed because a SKU mix, sale price, margin and validated CRM match rate were not supplied. This is a worked reporting example only.

ANALYST READ

Generate qualified dealer enquiries and traceable purchase outcomes - while keeping SKU specifications and warranty claims accurate. The next decision should be driven by verified downstream quality, not a single platform metric.

05 / DECISION SYSTEM

What to stop, fix, scale and learn

STOP	Unqualified instant forms that inflate lead volume but waste dealer follow-up.
FIX	Missing SKU IDs, duplicate leads, slow callback, stale stock or unsupported warranty language.
SCALE	Cities and models with verified stock, reliable dealer response and acceptable cost per sale.
LEARN	Match CRM outcomes weekly; report cost per qualified lead and cost per matched sale side by side.

90-DAY CONTROL PLAN

DAYS 1-30

Pick 2-3 SKUs; validate claims; connect lead IDs to CRM; pilot 3 creative families.

DAYS 31-60

Compare product-demo vs service-proof; optimise by qualified lead and appointment rate.

DAYS 61-90

Scale only with stock/dealer coverage; connect offline sale feeds; introduce margin-based reporting.

Risk controls: Warranty length and exclusions may differ by SKU and purchase date. | Dealer stock and follow-up quality can break attribution. | A platform lead or click must not be presented as a confirmed sale.
